Project ~~101~~ ~~102~~ 101

Index.html

↳ THE Archive is ALREADY wrote, and index
A comment line is the information about how
it may function and what it shall
contain as main content.

↳ ALL the produced information must be indexed
at this page. Groups must follow trees, being
part of the search-box. Related Fields must be
tagged, as well any information.

↳ The main goals can be written now, in order
to establish the last one: 1. Index the content
of human production ^{while} ~~as~~ storing its written digital
information; 2. Group and relate contents in trees,
leading to ordered information; 3. Store the ~~various~~ "various"
definitions, interpretations, and logical or best
meanings, as well mathematic and physical values of
each tag. Filters must be part of it as uses user
interaction within the code body.

→ Then three goals were set, each one with its own
level of difficulty.

1. Index content

2. ORDER: Group, relate, regroup.

3. Store: Definitions, Interpretation, basic, math, phys, average.
