# ENIGMA (SPACESHIP) V1

THIS is THE
FIRST MODEL
OF THE interstellar
SPACESHIP.

THE feasability of the
proofect depends on
the engine and the
control levers wich
are now existent to this
moment.

But we already have
means to make it interstellar,
in a few more years,
the next steps may be
taken, and shall be.

SCALE $\frac{1}{1}$ cm

⧄⧄	Glass 1
⊞	Glass 2
∥∥	Glass 3

2,1

Battery/supply-storage
eolic vent
Holo-Glass
menitor
E.G.II
lens

E.G. I = Engine One
E.G. II = Secondary Engine (STABILISATION)
E.G. EX = Example of engine locations (external)
Eolic vents can be added as W. burke system
Solar pads can be used as coating or be deployed -

THE CCCPU

$\frac{O_2}{VL}$ = $\overset{LED}{PANEL}$ and plants for O_2 supply

FUEL = liquid/solid/oxizer/battery2
WW = water waste
WR = water reservoir
Drawer = Drawing table/oekinen table
